A THANKSGIFING DINNER. A Noted Lecturer Tells What to Have and

How to Prepare It. Mrs. Rorer, a noted lecturer on the art of cooking, Monday, in Philadelphia, addressed an audience on the best manner of preparing a thanksgiving dinner, which was reported in full in The Times of that

The menu selected for the nationa holiday of this week was as follows: Clear Soup. Clear Soup. Shrimp Sauce. Timbale of Halibut. Roasted Turkey. Cranberry Jelly. Stuffed Peppers Sweet Potato Croquettes.
Sausage Balls. Lettuce Salad.
Lafers—Cheese. Charlotte Russe.

Sausage Date. Cha Wafers-Cheese. Coffee. How to Prepare the Turkey.

Mrs. Rorer devoted particular attention prepared for roasting, showing how it was possible to clean the poultry without soll-ing the hands. The internal organs being protected by a natural covering, they can be removed in a mass, care being taken not to break the gall bag or entrails.

Poultry should never be soaked in water, as this removes part of the flavor and much of the juice, and Mrs. Rorer recommended a sponge as the most suitable thing to wash the turkey with, it being afterward thoroughly dried with a towel. "Never wash the turkey until you are ready to cook it," cautioned the lecturer. "Remember that water will cause meat

of any kind to spoil quickly."

After putting the turkey into the roasting pan Mrs. Rorer placed a teaspoonful of sait and a small piece of bacon by its side, and added four tablespoofuls of water, "just enough to keep it from burning." On the turkey's breast were placed several small bits of fat taken from the

large turkey," said Mrs. Rorer, "should cook from lifteen to sixteen min-utes for each pound in a hot oven; if stuffed it takes slightly longer."

The receipt for the charlotte russe was as follows: One pint of good cream, two-thirds of a cup of powdered sugar, one teaspoonful vanilla, sugar, one-half box of gelatine, and a few drops of oil of almonds. Cover the gelatine with cold water and let it soak a half hour. Whip the cream and turn it into a large basin and place it in a pan of cracked ice; add to the soaked gelatine just enough hot water to dissolve it. Add the sugar carefully to the cream, then the vanilia, and last, strain the gelatine. Commence to stir immedi-ately; stir from the sides and bottom of

the basin until it begins to thicken; then pour into mould and place on ice to

The Committee Makes Its Annual Tour of Inspection, Looks at the Machinery, and Eats Turkey.

The Committee on Water met yesterday bortly after noon at the office of Super intendent Charles E. Boiling, and started from there on its annual tour of inspec The party consisted of Mr. J. White. chairman, and Messrs. Grooms Mounteastle, Brauer, Trower, of the conmittee; Mayor J. Taylor Ellyson, Joseph C. Dickerson, president of the Board of Aldermen; City Clerk B. T. August, Superintendent Bolling, S. E. Davis, clerk of the committee. The party started out in a large 'bus, and Mr. Bolling held the ribbons of the four-in-hand with as much dignity and skill as Colonel James Keene in New York.

The old pump-house was the first stop ping point, where Mr. J. W. Tomlinson superintendent of the pump-house, joined the visitors. From there the committee and its guests went to the Marshall Reservoir, where they were received by Mrs Baker, the superintendent, who entertained them in royal style with Thanks-giving turkey and a variety of sweets The new pump-house was next visited, and the New Reservoir was the last stopping point. At the new pump-house all the machinery, including the steam pump, was in full blast. . The committee, as well as their guests,

were highly pleased with the condition in which everything was found, and the statement of the superintendent that the department had never been in orking order was fully accredited by them.

While at the old pump-house the committee held a business meeting, with Mr. J. W. White in the chair.

The usual amount of routine business was disposed of and a number of curren bills ordered to be paid. Superintendent Boiling stated that there was a balance to the order of the committee of \$4,972.20; there was a credit to each account of the department, and this wa the first time that the committee ha-had sufficient money on hand to run th

"During the year we were forced to rur the steam pumps for the following number of days of 24 hours each: January, 245-6; February, 121-2; March, 1-4; April, 5-8; May, 13-4; June, 82-3; July, 71-4. In January and February the waste of water was immense, due to a large number of hydrants and other water fixtures being left open during the exces-

In the water-power pumps at the new pump-house gum valves and cast iron scats were substituted for the brass double beat cornish valves in the vertical plunger pumps during the months of July, September, and Ostober. These valves have given great satisfaction since used. The wear of the valve face is hardly noticed, and the seats are more rigidly kept in position with set-screws.

Since the last set of valves were put in, October Sist, we have been enabled to run the pumps at a speed of seventeen revolutions per minute, stop one set of varous to run the pumps at a speed of seventeen revolutions per minute, stop one

The pumps at the old pump-house are in very good condition with the exception of No. 3, the cylinder of which needs reboring. New cylinders were put in No. 7 and 8 during the year. The cogs of the moritee spur wheel will soon have to be recogged. The wooden bulk-heads of the water
